

Organisation Profile

Psychological, Mental Health, & Wellness Interventions

Mental Health Tanzania

Wellbeing of the mind

All About Mental Health Tanzania (MHT)

MHT is dedicated to promoting, protecting, sustaining, and maintaining psychological, mental health, and overall wellbeing at individual, community, institutional, and national levels.

MHT achieves this by creating, designing, developing, and implementing impactful programs, projects, campaigns, and initiatives.

The strategic approach include mental health advocacy, awareness, psychoeducation, psychosocial support, training, and research.

MHT also provides prevention, treatment, and management of mental illnesses and psychological challenges through holistic mental health and psychiatric clinical services including screening, psychological and mental health assessments, diagnosis, psychotherapy, counselling, and tele-mental health services.

Thematic Area of Focuses (drives/motives/priorities)/ Organisation Objectives

1. Promoting & advocating of mental healthcare systems in Tanzania
2. Mental health awareness & Psychoeducation
3. Mental health research
4. Clinical & psychiatric services (Psychotherapy, Counselling, psychological screening and assessments)
5. Community psychological & psychosocial support
6. Consultation, training, coaching & mentorship programs

The Need That Led to MHT's Establishment

It is evident that more people than ever are increasingly struggling with psychological challenges and mental illness, leading to a serious mental health crisis in our society that requires urgent intervention from grassroots level! Mental health struggles don't just hurt people—they weaken our workforce and communities

Good mental health reduces violence, improves social stability, impacts education, poverty, and productivity, contributes to national resilience, community stability, reduced societal conflict, and suicide rates

MHT was established in response to this growing need, with a commitment to promoting mental health, preventing psychological and mental health challenges, expanding access to quality mental healthcare, and contributing to the transformation of mental healthcare systems.

We're the Long-standing Mental Health Institution

MHT is proudly to be one of the firsts and long-standing mental health organizations in Tanzania:

- 2014: Started as The Mental Health Movement to advocate for mental health.
- 2018: Expanded into the Mental Health Initiative.
- 2019: Registered as a local Community-Based Organization
- 2020 ultimately registered to a nationally operating NGO

This evolution—moving seamlessly from a movement, to an initiative, to a local CBO, and ultimately to an NGO—has established MHT as one of the country's pioneering, longest-standing, and leading mental healthcare institutions, demonstrating its proven capacity, credibility, and lasting impact in advancing mental healthcare across Tanzania & beyond!

ARE YOU INTERESTED IN PARTNERSHIPS & OPPORTUNITIES OR OUR SERVICES?

You can be a part of or work with MHT in many ways including but not limited to program collaboration, sponsorship, internship placements, ambassador roles, volunteering, fieldwork and practicum placements; or as a mental health club members.

WHY SEEK MENTAL HEALTH SUPPORT?

Are you experiencing work-life balance problems; burnout due to stress, heavy workload, working overtime, interpersonal relationships challenge, absenteeism, feeling like you want to leave the job??

Investing in professional mental health support delivers real, lasting benefits.

Through counselling, corporate training, workshops, assessments, wellness programs, and crisis support, we help your people feel calm, strong, and in control again. They gain simple tools to handle tough days, spot warning signs early, bring more energy, work better together, stay longer, and perform at their best—thinking clearly, managing stress effectively, and staying resilient under pressure.

The result? A workplace that cares for mental health - boosts morale, innovation, loyalty, healthier & happier employees; higher productivity, stronger retention, lower absenteeism and high-performing organisation.
